### Mandel Scholion Research Group "Historical Linguistics and Formal Semantics"

*Organized by Elitzur Bar-Asher Siegal, Nora Boneh, Eitan Grossman, Aynat Rubinstein*

The group jointly explores in a systematic manner how studies in historical linguistics and in semantics can contribute to one another, in an attempt to draw conclusions about the properties of a variety of semantic categories (e.g. negation, temporality, modality), their universality, and the mechanisms underlying recurring shifts in meanings over time, or paths of semantic change, within these categories.

### Phonetics and Phonology Afternoon

an afternoon of talks and posters devoted to the sound patterns of language, i.e., phonetics and phonology. The speakers will be: **Aviad Albert** (The Institute for Linguistics and Phonetics, Cologne University), **Dr. Tirza Biron** (The Department of Physics of Complex Systems, Weizmann Institute of Science), **Hadas Yeverechyahu** (The Department of Linguistics, Tel Aviv University)

### Reading Group on "Concepts"

*Organized by Malka Rappaport Hovav and Preston Werner*

We will look at current developments in the psychological, philosophical and linguistics literature on concepts. What is the structure of concepts? How are they learned and develop? How are they composed, and how do they interact with other cognitive systems?

### LLCC Proseminar

*Organized by David Kashtan, Galit Agmon and Todd Snider*

We will discuss classical and current literature on foundational questions regarding language, its representation and use drawn from the fields of linguistics, philosophy and cognitive science. This forum is meant as a meeting place to discuss these issues with the entire LLCC community

### ERC EMODHEBREW (MABAR)

*Organized by Edit Doron and Miri Bar-Ziv Levy*

We discuss a type of linguistic discontinuity – language revival – inspired by the revival of Hebrew at the end of the 19th century. We aim to construct a model of the linguistic factors which have shaped the revival of Hebrew. We document the development of the grammar of Modern Hebrew, in particular its syntax, and conceptualize it within existing theories of linguistic contact and discontinuity.
