### LLCC proseminar

*Organized by David Kashtan, Galit Agmon and Todd Snider*

We will discuss classical and current literature on foundational questions regarding language, its representation and use drawn from the fields of linguistics, philosophy and cognitive science. This forum is meant as a meeting place to discuss these issues with the entire LLCC community

### ERC EMODHEBREW (MABAR)

*Organized by Edit Doron and Miri Bar-Ziv Levy*

We discuss a type of linguistic discontinuity – language revival – inspired by the revival of Hebrew at the end of the 19th century. We aim to construct a model of the linguistic factors which have shaped the revival of Hebrew. We document the development of the grammar of Modern Hebrew, in particular its syntax, and conceptualize it within existing theories of linguistic contact and discontinuity.

### The Mandel Scholion Research Group "Historical Linguistics and Formal Semantics"

*Organized by Elitzur Bar-Asher Siegal, Nora Boneh, Eitan Grossman, Aynat Rubinstein*

The group jointly explores in a systematic manner how studies in historical linguistics and in semantics can contribute to one another, in an attempt to draw conclusions about the properties of a variety of semantic categories (e.g. negation, temporality, modality), their universality, and the mechanisms underlying recurring shifts in meanings over time, or paths of semantic change, within these categories.

### LaTeX for Linguists workshop

*Organized by Todd Snider*

Todd will host a workshop on the document preparation software LaTeX, what it is and how it can be useful for linguists. The first section of the workshop will be a presentation, showcasing a variety of features and options which working in LaTeX provides. Then, we will engage in a more hands-on tutorial, where attendees will be encouraged to play around and start to build a familiarity with some of the basic functionalities of LaTeX.

### Preparation mini-course

*Organized by Elitzur Bar-Asher and Shira Tal*

In December we will be hosting a mini-course by Stephen Crain on the Logical Structure of Child Language, focusing on the cross-linguistic development of linguistic structures that contain logical expressions, including logical connectives and quantifiers. We will hold two sessions in preparation.

### Reading Group on “Concepts“

*Organized by Malka Rappaport Hovav and Preston Werner*

We will look at current developments in the psychological, philosophical and linguistics literature on concepts. What is the structure of concepts? How are they learned and how do they develop? How are they composed? How do they interact with other cognitive systems?
